Pune, India | Mr.omkargaikwad@gmail.com | 8805861881 | mromkargaikwad.vercel.app

PROFESSIONAL SUMMARY

IT professional with 5+ years of experience across Healthcare and Telecom, with hands-on experience in HL7 healthcare integration, interface development, end-to-end interface build lifecycle, troubleshooting, SQL administration, and enterprise workflow support. Experienced with Rhapsody, Mirth Connect, JavaScript, MSSQL, XML, HL7, FTP, and TCP/IP, with healthcare systems including EHR and EMR. Skilled in requirements gathering, specification review, interface customization, testing, deployment, production support, and client communication.

CORE SKILLS

- HL7 Integration: HL7, Healthcare Integration, Interface Development, Interface Troubleshooting, EHR, EMR, FHIR, DICOM, HIPAA
- Integration Engines: Rhapsody, Mirth Connect, Allscripts Engine
- Programming & Data: JavaScript, Python, SQL, T-SQL, XML, Shell Scripting
- Connectivity & Interfaces: FTP, TCP/IP, Message Routing, Data Mapping, Transformations, Interface Testing
- Databases & BI: Microsoft SQL Server (MSSQL), SSMS, MySQL, Power BI, Triggers, Views, Stored Procedures • Tools & Platforms: Jira, ServiceNow, Azure, Databricks, Grafana, SiteScope

PROFESSIONAL EXPERIENCE

Technical Consultant | Veradigm India Pvt. Ltd. | 02/2023 – Present

- Work on the end-to-end HL7 healthcare integration and interface build lifecycle, from KOC and information gathering through specification review, interface development, customization, testing, deployment, and transition to production support.
- Gather integration requirements, understand business and technical workflows, review interface specifications, and translate requirements into effective HL7 integration solutions.
- Develop, customize, test, deploy, and support healthcare interfaces using HL7, Rhapsody, and Mirth Connect for EHR/EMR integration workflows.
- Analyze HL7 and XML messages, identify mapping and data issues, and troubleshoot interface processing and integration failures across connected systems.
- Develop transformation and message-processing logic using JavaScript within integration engines.
- Configure and troubleshoot connectivity using FTP and TCP/IP connections for reliable exchange of healthcare data between systems.
- Work with HL7 message workflows, mappings, transformations, routing, and error-handling processes.
- Write and execute MSSQL/T-SQL queries and work with Tables, Views, Triggers, and Stored Procedures to support integration workflows and data validation.
- Perform interface testing and validation, investigate defects, resolve integration issues, and coordinate fixes with internal teams, clients, and external stakeholders.
- Monitor Rhapsody and Mirth Connect interfaces and production workflows, investigate failures, and provide ongoing production support.
- Prepare technical documentation, work plans, interface specifications, and implementation details throughout the integration lifecycle.
- Coordinate transition of newly developed/customized interfaces to the support team, ensuring documentation, knowledge transfer, and operational readiness.
- Act as a technical point of contact for interface requirements, implementation discussions, troubleshooting, and production issues.

Associate Technical & Business Operations Analyst | Amdocs | 08/2021 – 02/2023

- Provided database support, performance monitoring, SQL administration, and production support for retail applications.
- Executed complex SQL scripts and investigated slow-running queries to support application performance and data-driven tasks.
- Maintained documentation for database incidents, configuration changes, and operational procedures.
- Triaged escalated support tickets and ensured strict SLA adherence for database-backed systems.
- Scheduled and monitored jobs and proactively monitored application performance using NGM, Grafana, and SiteScope.

EDUCATION

Master of Computer Science | SPPU Pune University (MIT College of Science, Alandi, Pune) | 07/2019 – 04/2021

TECHNICAL SKILLS

Healthcare & Integration: HL7, Rhapsody, Mirth Connect, EHR, EMR, FHIR, DICOM, HIPAA, XML, REST API, API Testing, FTP, TCP/IP
